## Allan's Musings

Ah, February. That means that the officers meeting in lovely Fresno is behind us, most of winter is hopefully also passed.

Now we can do some serious riding, with Bobs February ride looming and the new schedule for the districts poker rides also published, all we have to do is service the wing, plug in the electrics and ride.....

As for the officers meeting held a few weeks ago in Fresno, I thank the Bill and Linda Androws and of course my trusty ACD Dale Croy. I am sure that it was as enthralling for them as it was for me, and any of you who have had the pleasure of attending one of these meetings can understand exactly my subtle message.

As for things that will affect our chapter this coming year, first thing and in my opinion it is with out a doubt a very positive move, Dale will be sworn in as CD in March, he has a much better concept of the things our chapter needs and the rides he sets up are superb, he has a lot more time to spend on chapter related business then do Kay or I, and that alone is definitely a positive. The main focus for the chapter will continue to be the SAFETY portion of the GWRRA Motto, we are blessed with wonderful talents and will be able to provide the chapter with a certified ERC course as well as a First Aid / CPR course, so when the dates are announced, do not hesitate to reply, as any slot not filled will be farmed out to one of our local chapters.

One of the things we learned during our visit to Fresno, the COW folk from Riverside are planning an chapter event that is set to be central to the entire state, this extravaganza will be held over the week end on September 23<sup>rd</sup> and 24<sup>th</sup> as you are surely all aware these folk go all out and this little get together will be no different, so keep an eye on the district web site as well as ours and CA1M.

As our time as officers of CA2Q comes to an end, we would like to thank all members who have helped when the need was there, everyone who offered encouragement and kind words when they were needed, and to all, thanks for your friendship. We have had some very enjoyable times and we will definitely treasure the friendships for years to come.

Many happy hours (not that type) have been spent riding with chapter members, during that time we have formed relationships that would never have been formed as there was no other reason to be associating with these people other then the fact they also rode Gold Wings and new how to enjoy life. For that fact alone we thank each and every one of you.

Well there it is in its entirety, so until next time, ride safe and enjoy life; it can all be too short.

**Allan**

*Edited for U.S. reading by Kay.*

## Golden State Gems

The papers have been signed and Bakersfield is a go for our 2005 District Rally over Labor Day weekend, September 2<sup>nd</sup> through the 4<sup>th</sup>. The location is the Doubletree Hotel at 3100 Camino Del Rio Court, Bakersfield 93308. The room rate is \$79/night and the hotel is VERY nice. You can call 661-323-7111 starting now to make your reservations. That's all for this month so I can make room for the following information from Mike Wright, GWRRA President and Executive Director. Please take the time to read this and take it to heart.

Hello Everyone

In recent years we have begun each year with a theme. The themes have typically been goal oriented and geared at the Association growth.

Emphasis was put on the Officers to carry out the theme/goal and convince the Members to embrace it. If you recall the theme last year was "Get One" and the year prior was "7% growth" etc.

This year we wanted to have a theme that was not Association driven but "Member driven". The theme needed to be profound yet simple and was already part of GWRRA, whether we gave it conscious thought or not. With the right theme and enthusiasm, we know that recruiting and retention becomes reality and not necessarily a burden to be shared.

This year - the theme is (insert your drum roll) "Make a Difference". This theme is about the Members. It is about the future. It is about all of us. No one has to buy into this theme and we do not have to convince the Membership that this is a good theme. The very fact that they are a Member says that GWRRA makes a difference to them and if they are one of some 4,000 Officers and Staff who volunteered for their position, clearly they want to make a difference to others. As Officers, Former Officers and Staff, our job this year is to cultivate and nourish Member enthusiasm!

There are so many ways to use this theme, countless examples and "spins" that can make this one of the most powerful themes we have ever had. Simply put - this year is filled with optimism and we need to celebrate every success no matter how small or how grand.

On the National level we have a few things in mind to support the theme. Firstly, we will feature short "Making a Difference" articles in Wing World. The article could be a Gold Book story, a recognition of a Chapter who visits a retirement home, or raised funds for a charity or supported a Member in need. It might be a short story on a District Director who took a struggling Chapter under his/her wings and made it thrive. We hope to hear of many stories of Chapter activities that have great turn-out etc., and we encourage each and every one of you to let us know of these stories and we want you to encourage everyone else to do the same.

Making a difference comes in many forms and it is for each of us to decide how we want to interpret and act out the theme. Do you want to make a difference to other Members, your community, other Riders in general? Are the friendships and family found in GWRRA what makes a difference to you? Is it offering recognition for efforts that "Make a Difference" to others? Maybe Wing World or one of our other benefits is what makes the difference to some.

Regardless - GWRRA makes a difference because our Members make a difference so let's all of us "Make a Difference" in 2005! Let's use the phrase in our emails, our letters and in our verbal communications. Let's get people excited!

With great anticipation,

Mike

"MAKE A DIFFERENCE"

# Stopping a Motorcycle

by Mark Kratz  
CA2Q Chapter Educator

## Introduction

Improper braking is one of the main causes of motorcycle accidents. The 1981 "Hurt" study found that rider error was responsible for two thirds of the 3,600 accidents analyzed, which resulting in a slide-out and fall, caused by over braking. Through experienced, advanced, or other rider training courses, you can learn proper braking techniques, which you can practice during the course of your every day riding. This will increase your skill level and help reduce your chances of being in an accident.

## 1. General

- (a) Most people have little difficulty in stopping a car. A car will not fall over when stopped and both feet are free to operate the clutch and brake before, during and after the stop. Stopping motorcycle is accomplished with the use of both hand and foot brakes, leaving one foot to maintain balance when stopping. Use the "Four finger" braking technique, **not** two or three fingers. If this develops into a habit, your fingers may be trapped between the brake lever and the grip during emergency stops. This will not allow you to use the full efficiency of the front brake, which provides 70– 80% of your total braking ability.
- (b) At intersections, keep the left foot on the ground, the transmission in 1<sup>st</sup> gear with hand on the clutch (engaged) and right foot, or right hand on the brake. This will minimize foot injury if you are rear ended and will allow for a quicker movement, if a hazard is pending and you need to move out of the way. But remember the "**Dirty Foot Down**" rule. You may need to switch which foot you put down, based on surface appraisal. If you are in a column of twos in the right hand wheel track of the lane, putting your left foot down in the oil/grease track is not a good choice. There are times when you must decide to put the other foot down instead. When putting your foot down, do so heel first like an exaggerated goose step. This will decrease the likelihood of catching your foot underneath your footrest or saddlebag. Foot injuries account for 40% of the injuries sustained by motorcycle riders.

## 2. Emergency Stops

- (a) An emergency stop is executed by simultaneously:
  - (1) Turning or rolling off the throttle
  - (2) Disengaging the clutch
  - (3) Applying a controlled, steadily increasing pressure, by **squeezing** the front brake. **DO NOT GRAB THE FRONT BRAKE LEVER!!!**
  - (4) Applying the rear brake in a controlled manner
- (b) NOTE – Don't worry about down-shifting. Keep your right foot on the brake to the end of the stop (ease off pressure if lock up occurs), putting your left foot on the ground upon completion of the stop. Prolonged sliding of the rear wheel usually will cause a sideslip, or fishtail action of the rear wheel. This fish tailing action occurs by any (even slight) leaning, or turning of the machine while the rear wheel is sliding. This side-slipping action can be controlled by releasing pressure to the rear wheel brake for an instant. Most emergency stops can be avoided by defensive driving.

3. Broad-sliding or "Laying the Bike down"
- (a) Broad-sliding (or laying the motorcycle down), is lieu of upright emergency stopping procedure, is contrary to safe operating procedures. Once a motorcycle is laid down, an accident has occurred. Keeping the motorcycle upright allows not only braking to a slower speed prior to impact, but maintains your ability to maneuver out of the accident, should the opportunity present itself.
  - (b) A motorcycle sliding on its side, has only half the co-efficient of friction, or drag factor of an upright motorcycle using properly applied braking techniques, in emergency stop situations. Newton's Laws of Physics also tell you that; "An object in motion, will travel in a straight line, unless acted upon by an external force". This means you have no control once you lay a motorcycle down. You will slide twice the distance than a properly braked motorcycle and thus you will impact at a greater speed, and possibly slide underneath the vehicle you are in conflict with, which will increase the likelihood of additional injury, due to being run over, or trapped underneath the other vehicle. Maintaining brake pressure will reduce your speed significantly if a collision is inevitable, plus you have the option of maneuvering at the very last moment.

4. Additional thoughts

- (a) A motorcycle has the ability to stop in shorter distances than the average passenger car. Due to its size, weight and ability to accelerate, a motorcycle can also maneuver around and by hazards. During emergency braking situations, the rider must be aware of the vehicles behind them, which cannot stop within the same distances. Be wary of this fact, especially in heavy, or freeway type traffic and your options to move around an obstacle ahead, by driving onto the hard shoulder, or by the center divider, or in between other vehicles, to avoid being rear-ended.

Always anticipate that you may have to utilize emergency braking techniques, or take evasive maneuvers, whenever you approach intersections, or are following other vehicles. Anticipating potential threats will help reduce your perception and reaction time.

You should always be constantly appraising the surface on which you ride, whether it's dry pavement, or the greasy, oily pavement at intersection entrances and in or near service stations. Be aware of leaves, gravel or sand on the roadway, painted surfaces, or anything else, which may reduce your tires ability to maintain traction. The presence of these items can cause your wheels to lock up, even during normal braking. By constantly evaluating the surface you are on, you will also reduce your chances of mishap, or embarrassment.

Without proper training or instruction, a rider may continue using improper techniques and develop bad habits, which will manifest themselves during emergency situations. A training pad is the place to learn your limitations and develop your skills. It is up to you to learn what your limitations are, so that you know what situations to either avoid, or develop your skills to overcome your weaknesses. It always amazes me to see how some riders are more afraid of being embarrassed in front of a group of their peers, than fear the consequences of being in a motorcycle accident.

*"The greatest mistake we make is living in constant fear that we will make one."  
John Maxwell*
